

Secret Squares

The game can be played with 2 or more players. Take turns by connecting any two adjacent dots with a line. The object is to try and complete a box. If you connect two dots that completes a box, you put your initial in the box and take another turn. If you do not complete a box, the next person goes. You continue like this till all boxes have been completed. Once all boxes are complete, tally the score by giving 1 point for each completed box, or the points from below if you have one of the bonus objects in your box. The player with the most points wins.

The alien and the spider are worth 3 points

The trophy and the money are worth 5 points

The allusive spy is worth 10 points
